

**Irodalomjegyzék**  
**Vegyipari optimalizálás (BMEVEVMU415)**  
**2010/2011 őszi félév**

- Biegler L. T., Grossmann I. E., and Westerberg A. W. (1997) Systematic methods of chemical process design. Prentice Hall, International Series in the Physical and Chemical Engineering Science. (PDF)
- Duran M. A., and Grossmann I. E. (1986) A mixed-integer nonlinear programming algorithm for process systems synthesis. *AIChE Journal*, 32(4), 592-606. (PDF)
- El-Halwagi M. M. (1997) Pollution Prevention through Process Integration. Academic Press, San Diego (PDF)
- Farkas T. (2006) Chemical Process Synthesis Using Mixed Integer Nonlinear Programming, PhD thesis (PDF)
- Hillier F.S., and Lieberman G.J. (1994) Bevezetés az operációkutatásba, LSI Oktatóközpont, Budapest (Tankönyvolvasó 417.406)
- Raman R., and Grossmann I. E. (1991) Relation between MILP modelling and logical interference for chemical process synthesis. *Computers & Chemical Engineering*, 15(2), 73-84. (PDF)
- Viswanathan J., and Grossmann I. E. (1993a) An alternate MINLP model for finding the number of trays required for a specified separation objective. *Computers & Chemical Engineering*, 17(9), 949-955. (PDF)
- Viswanathan J., and Grossmann I. E. (1993b) Optimal feed locations and number of trays for distillation columns with multiple feeds. *Industrial & Engineering Chemistry Research*, 32(11), 2942-2949. (PDF)
- Winston W.L. (2003) Operációkutatás, Aula, Kiadó, Budapest (Tankönyvolvasó 364.377/1)
- Yeomans H., and Grossmann I. E. (2000) Disjunctive programming models for the optimal design of distillation columns and separation sequences. *Industrial & Engineering Chemistry Research*, 39(6), 1637-1648. (PDF)
